Summary

Software Engineer at Shell

VIT University | 2019 | 8.81 CGPA

Experience

Software Engineer - IT

Shell

Jul 2019 - Present (10 months +)

Currently I am working on a Test Framework and Test Automation using Selenium and Java.

Software Engineer Intern

Vicara

Dec 2018 - Jun 2019 (7 months)

I worked on their flagship product the "Kai", a gesture based controller.

I was part of building the SDK for the Kai, a desktop app: "Kai Control Center" as well as a library released for 3rd party developers. (C#, Cross Platform, Javascript)

I also worked on their backend API (Node+TS, MySQL)

My role involved working with serial IO, websockets, IPC, web application backend logic/scaling/infrastructure[reverse proxy/ load balancing/HA/Failover]

MSR Software Engineer Intern

MSR IT Ltd.

May 2018 - Jun 2018 (2 months)

I was tasked with designing a hospitality chat-bot, as per requirement of client.

I designed the chatbot using the Snips NLU library

Implemented in Python.

Made a REST interface for the chatbot, to enable easy integration with their Java based system.

I also programmed easy configuration of the system, through JSON config files, since the company had little experience with python

Education

Vellore Institute of Technology

Bachelor's Degree, Information Technology

2015 - 2019

The Heritage School

ISC, Science

2002 - 2014

Skills

Node.js • Java • MongoDB • Python • MySQL • Linux • Go (Programming Language) • Amazon EC2
